ADDITIONAL INFORMATION

Anti-collision technology

- Minimizes the risk for damages on a desk caused by squeezing or blocking of obstacles in up and down direction.

Things to be aware of:

- Does not work if the collision happens during the initialization phase;
- If the collision happens within the 1st sec of use or after the button on the control unit has been released, it will not work;
- If the collision happens over too long time and with the very soft object, it will not work.
